

3. (Amended) A carrier according to claim 1, wherein said pocket or pouch comprises contours or ridges therein.
4. (Amended) A carrier according to claim 1, additionally comprising a retainer within the pocket or pouch for retaining product thereon.
5. (Amended) A carrier according to claim 1, wherein each of the ends of the elongate strip has a non self-binding adhesive portion.
6. (Amended) A carrier according claim 1, wherein each of the ends of the elongate strip has a peelable cover thereon.
8. (Amended) A carrier according to claim 5, wherein the adhesive portion enables attachment of the carrier to mammalian skin.
9. (Amended) A carrier according to claim 1, comprising at least one further join-forming at least one further pocket or pouch for containment of medicament.
10. (Amended) A carrier according to claim 1, wherein the ends of the elongate strip form a pair of pull release tabs.
12. (Amended) A carrier according to claim 10, wherein each of the pull release tabs has a looped end.
13. (Amended) A carrier according to claim 10, wherein each of the pull release tabs has at least one perforation therein.
14. (Amended) A carrier according to claim 1, additionally comprising a drawstring opening mechanism.

16. (Amended) A carrier in multi-unit form comprising a series arrangement of a plurality of carriers according to claim 1.
20. (Amended) A carrier according to claim 16, wherein each pocket or pouch is foldable to lie flat alongside the elongate strip.
21. (Amended) A carrier according claim 1, wherein the elongate strip is flexible.
22. (Amended) A carrier according to claim 1, wherein the elongate strip comprises material selected from the group consisting of metal foil, an organic polymeric material and paper.
24. (Amended) A carrier according to claim 1, wherein the join is formable by a joining method selected from the group consisting of heat, laser, radio frequency, adhesive, staple, stamp, pressure and ultrasonic sealing.
25. (Amended) A carrier according to claim 1, wherein the join is peelable to enable peelable access to the pocket or pouch.

Please cancel claim 26.

27. (Amended) A carrier according to claim 1, wherein said medicament is in dry powder, tablet, liquid, paste, cream or capsular form.
28. (Amended) A carrier according to claim 1, wherein said medicament is selected from the group consisting of albuterol, salmeterol, ipratropium bromide, fluticasone propionate and beclomethasone dipropionate and salts or solvates thereof and any mixtures thereof.
29. (Amended) An inhalation device comprising a housing in combination with a medicament carrier as claimed in claim 1.

32. (Amended) A method of making a carrier comprising forming a fold between a first portion and second portion of an elongate strip such that said first portion contacts said second portion; forming a join between said first portion and said second portion wherein said join and the fold form the edges of an open pocket or pouch for containment of medicament; filling said open pocket or pouch with a unit dose of medicament; and closing said open pocket or pouch by forming a further join.

34. (Amended) A method of opening a carrier as claimed in claim 10 comprising pulling the pair of pull release tabs in order to enable access to the pouch.

35. (Amended) Use of a carrier according to claim 1, for dispensing medicament.
